5) Cookies

A cookie is a small text file that is downloaded onto a computer or smartphone when a user accesses a website. It allows the website to recognise that user’s device and store some information about the user’s preferences or past actions.

Cookies cannot identify you and you can remove or reject cookies by changing the settings in your browser.

Google Analytics is a web analysis service provided by Google. We use the service to tell us how many visitors we have had to our site, to help us to know which pages are most visited and to see how visitors move around the site.
